ORIENT ROAD TO BUILD TO DEL RIO

Citizens Sign Up With Stillwell to Extend South from San Angelo.

BOND SIGNED IN EL PASO

Del Rio, metropolis; El Paso No. 2. That is what it is coming to, believe its men of affairs, and it appears as though it were more than probable, almost certain, years to come. The finishing touch yesterday was placed on the bond which will make Del Rio a pass into Mexico, and in time will bring many of the good things which have come to El Paso. And by an unconscious fitness, the deal which will make the new pass city, was made in the old pass city, El Paso del Norte.

When the Stillwell special arrived at the union station, last evening, two Texans met the railroad financier. They were: W. F. Boggs and James McLugan, representing the Commercial club of Del Rio. They held contracts between the community they represent and the Kansas City, Mexico & Orient railway. The contract was already signed on the part of the civic representatives. It alone waited for the big railroads. When the Stillwell special train departed over the international bridge, the contract was clinched, and the future of Del Rio made certain. The Orient road will run directly through the border city on the east, forming a crossing of trunk lines similar to that at the border city of the west. What the railroads have done in making El Paso, this city knows. What they will do in making Del Rio, is almost certain.

Only minor details, drawn up by the corporation attorneys, were changed on request of the city. The contract was for the purchase of \$200,000 of bonds by the community, payable in installments. Already the city has raised the first two payments. The total must be paid within three years. The road must be built within three years, but promises of a much sooner date have been made.

A. E. Stillwell does not make towns for nothing. He asks that the towns help to make the main line, the new road might be run a few miles to the east, and perhaps, a new town built by the corporation. Now this fear is removed. Del Rio will get the road, and the city will be a direct route to Kansas City and the north.

Del Rio is located on the main line of the G. O. & N. P. A. territory all its own 450 miles from El Paso; 175 miles San Antonio; 180 miles south of San Angelo. Already the Orient line has reached the northern city. The deal closed in the morning of the 24th, and the building of the road through Del Rio, located on the international line, and joining with the International of Mexico now as far as Eagle Pass, 60 miles south of Del Rio.

feast was called Purim, from Pur or lots because Haman had cast the lot to determine on the extermination of the Jews, with his friends, who had advised him against his intended treachery.

The Preservation of Israel.
Many modern critics have called into doubt the credibility of the book of Esther on the ground of the extraordinary nature of the occurrences recorded. They have reduced the story of Esther from the dignity of an historical narrative to a mere work of fiction, to a five-act play, written by some Persian Jew living at the time of Solomon's reign. Whether it is so or not, what is impossible to happen in civilized countries in modern times may have had some chance of actual occurrence in an Oriental empire under the extraordinary rule of a capricious and weak minded despot. Similar things have happened since. If Haman is but the creature of fiction and romance, history can show types of Jew hating Haman that were real incarnations of prejudice and anti-semitism.
